ASSIGNMENT: Summarizing a Journal Article by Dr. Thomas Joiner

Objectives

- ✓ *To practice skills of reading technical research reports*
- ✓ *To broaden knowledge of current psychological research*

APA Goals for the Undergraduate Psychology Major (2.0)

GOAL 2: Scientific Inquiry and Critical Thinking

- 2.2 Demonstrate psychology information literacy
- 2.4 Interpret, design, and conduct basic psychological research

GOAL 4: Communication

- 4.1 Demonstrate effective writing for different purposes
- 4.2 Exhibit effective presentation skills for different purposes

Instructions

Choose one of the journal articles listed below or search the list of publications from Dr. Joiner's publication [website](#) to pick your own article.

1. Prepare a summary of the research experiment that you read from your chosen article. You will be preparing a series of PowerPoint slides for your analysis. A template for organizing your analysis is below.
2. Turn in your assignment as a voice-over PowerPoint. Don't just read your slides. Expand on them to demonstrate that you are comfortable with the content. If you have never done a voice-over before click [HERE](#) for instructions.

Suggested Articles:

Template for assignment (generally 1 slide for each bullet)

- Provide a properly formatted APA reference citation.
- In 1 or 2 sentences, state the research question(s) addressed by the experiment.
- Give a clear and accurate statement of the research hypothesis/hypotheses.
- Identify the participants and describe how they were selected for the study.
- Give a brief description of the procedure.
- In a brief bulleted list give a description of the results and what they mean. You do not need to include numbers or statistics in your statements.
- Indicate any qualifications on interpreting the results and identify any questions for future research that are raised by the study.
