

### **Covid-19 Mitigation Guidelines Quick Guide**

Delaware Valley University has been tracking the evolving guidance on masks/face coverings from the CDC, the Bucks County Health Department, and the state of PA. As of December 15, 2021, guidelines are as follows. Please note that this will be updated by June 1, 2022 based on recommendations at that time.

The University expects campers and camp staff to follow the guidelines above and reserves the right to remove campers from campus or close camp programs for non-compliance.

- Outdoors: masks are not required for campers or camp staff, although we recommend that those individuals who are both unvaccinated and engaged in close proximity (closer than 3' for 15 minutes or more within a 24-hour period) wear face coverings/masks out of an abundance of caution.
- Indoors: ALL individuals, regardless of vaccination status, must wear masks indoors.
- Cloth face coverings must cover both the nose and mouth. Gaiters, bandanas, and masks with respirator valves are not acceptable.
- Social distancing measures will be in place.
- Hand sanitizer will be available for everyone. Participants and staff will wash their hands and/or use hand sanitizer before entering the classroom and throughout the daily program.
- Time has been allowed between activities, snack and lunch periods to disinfect surfaces.
- If any materials or equipment need to be shared, they will be sanitized between users.
- Participants and staff must protect others through good respiratory/cough and sneeze hygiene practices.
- Participants or staff must stay home (or go home) from camp if experiencing symptoms of illness, seek medical help, and avoid people who are ill.
- Thank you in advance for your cooperation.

*The university's processes and procedures may need to change in response to the local COVID-19 situation, which may result in changes to our camps/youth programs. We appreciate your understanding and patience during this evolving situation.*
